

	<b>LALLZYME<sup>®</sup></b>	<b>EX-V</b>	
<b>APPLICATION</b>	Red grapes maceration for elaboration of full-bodied wines.		
<b>DESCRIPTION</b>	Granulated high concentration pectinase with full range of secondary activities. FCE. Origin : <i>Aspergillus niger</i> .		

## ACTIVITY AND MODE OF ACTION

LALLZYME EX-V is formulated to allow a rapid liberation of the intra-cellular contents due to the synergistic effect of concentrated pectinases and the specific activity of selected secondary activities (cellulase, hemicellulases) on lysing and releasing other polysaccharides from the grape cell wall.

LALLZYME EX-V :

- Allows for a complete and rapid release of the anthocyanins,
- Allows for a more efficient release of tannins and their subsequent binding with the anthocyanins and greater stability of the wine.

### LALLZYME EX-V Performance Profile

## DOSAGE

Application	Parameters (temperature/time)	Recommended dosage (g/100 kg)
Skin fermentation	18-28° C / 2-8 days	1-2 g
Skin fermentation + maceration post fermentation	18-28° C / > 8 days	2 g Possible to split addition in two times : • 50 % at beginning of maceration • 50 % mid-maceration

Dilute the enzyme in an adequate amount (avg. 1 in 10) of water or grape must to allow an even distribution in the whole quantity of grapes. LALLZYME EX-V should be added before filling maceration tank.

## PACKAGING, STORAGE AND HANDLING

<ul style="list-style-type: none"> <li>• LALLZYME EX-V is available in 100 g sealed plastic jars, supplied in 10 kg cartons (10 x (10 x 100 g)).</li> </ul>	<ul style="list-style-type: none"> <li>• Sealed containers may be stored in a dry place at room temperature. Refer to bottom label of containers for expiry date.</li> </ul>	<ul style="list-style-type: none"> <li>• Direct skin contact and dust formation should be avoided. Enzymes may cause sensitization by inhalation. For further details, please refer to LALLZYME EX-V Material Safety Data Sheet (MSDS).</li> </ul>
